GitHub: https://github.com/Jeet-Lohar-itzJeeSKUULL
Mobile: +91-82503-16894

SKILLS

Languages: C++, Java, Python, Kotlin, SQL, Git/GitHub
Data Tools: Power BI, MySQL Workbench, Pandas, scikit-learn, ETL, Informatica Developer for Data Quality (IDQ)
Development Tools: Android Studio, Firebase, Cloudinary, Figma, Canva
Soft Skills: Problem-Solving, Adaptability, Teamwork, Effective Communication

PROJECTS

Stock Market Price Predictor and Dashboard Insights | GitHub — Jan' 25 – May' 25

- Developed an Excel + Power BI dashboard analysing 60+ companies with automated data cleaning and KPI tracking.
- Built Excel, and Power BI dashboards with automated data cleaning, KPI tracking, and EDA (correlation, volatility, moving averages). Expanded with a Python ML model using scikit-learn achieving 85%+ accuracy, with complete preprocessing and evaluation (MAE, RMSE).
- To generate insights and improve stock trend prediction using data-driven analysis.
- **Tech Stack:** Python (scikit-learn), Pandas, Excel, Power BI.

Car Data Analysis | GitHub — Jan' 25 – May' 25

- Performed exploratory data analysis and predictive modeling on car performance datasets.
- Built Linear Regression models achieving strong R^2 and low MAE, improving prediction accuracy by 15% using feature engineering.
- To identify key factors influencing fuel efficiency and enhance prediction performance.
- **Tech Stack:** Python, Pandas, scikit-learn, Matplotlib, Seaborn.

VentureHub – Startup, Investor & Manufacturer Collaboration Platform | GitHub — Jan' 26 – Feb' 26

- Developed a full-stack Django platform connecting Startups, Investors, and Manufacturers with role-based authentication and dashboards.
- Implemented modular apps, custom user model, secure authentication, and features like profiles, product listings, investment workflows, and messaging. Managed Git workflow using feature branches, pull requests, and conflict resolution in collaborative development.
- To streamline collaboration, funding processes, and business networking.
- **Tech Stack:** Django, SQLite, HTML, CSS, JavaScript, Git.

MangaQuiz – Role-Based Online Test & Assessment Platform | GitHub — Jan' 26 – Feb' 26

- Developed a role-based Django examination platform supporting Admin, Teacher, and Student workflows.
- Implemented OTP authentication, dynamic test creation with auto-save, submission tracking, result publish/unpublish, and analytics dashboard.
- To automate and digitize test creation, evaluation, and performance tracking.
- **Tech Stack:** Django, SQLite, HTML, CSS, JavaScript.

EXEPRIENCE / TRAINING

Vintage Studio - Android App Development | GitHub — Jun' 25 – Aug' 25

Lovely Professional University – Phagwara, Punjab

- Designed and developed a modular Android app using Fragments, Bottom Navigation, and clean UI architecture.
- Integrated FireStore + Cloudinary + SQL for event management and image storage. Implemented dynamic event listing, detailed event views, authentication, and role-based UI controls.

CERTIFICATIONS / CERTIFICATES

Cloud Computing – NPTEL — Jan' 25 – Apr' 25
Computer Communications Specializations – Coursera — Aug' 24 – Nov' 24

EDUCATION

Lovely Professional University Aug' 23 - Present
Bachelors of Technology in Computer Science and Engineering Phagwara, Punjab
CGPA – 6.98

Burnpur Riverside School Apr'22 – Mar'23
Intermediate – 63.4% Chittaranjan, West Bengal

Burnpur Riverside School Apr'20 – Mar'21
Matriculation – 70% Chittaranjan, West Bengal
